Clinically Focused  
**CUSTOMER SERVICE**

Fully  
**CUSTOMIZED STORAGE**

State of the Art  
**INVENTORY MANAGEMENT**

MASS™ Medical Storage products  
can be found in hospitals both  
large and small all over the world.

As a leading innovator in its field,  
MASS™ constantly reinvents  
designs in order to provide  
clinicians with the most effective  
storage units on the market.

In every hospital, in any  
department, MASS™ produces a  
medical storage solution that fits  
the needs of its clients.

It is this intense focus on the  
customer's needs that makes  
MASS™ Medical Storage one of  
the top manufacturers in the  
industry today.

## INVENTORY CONTROL

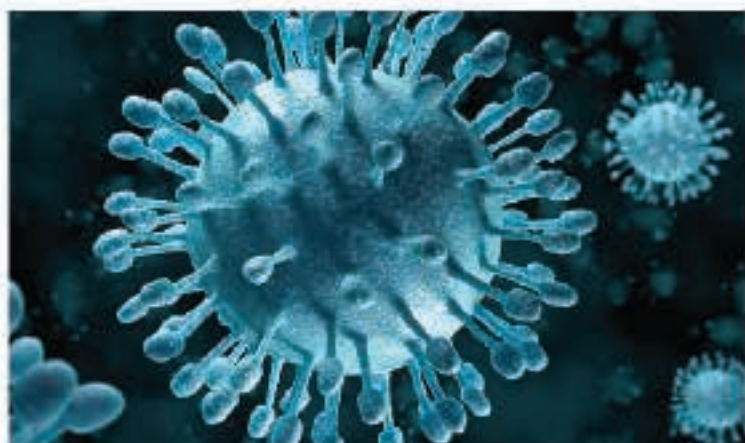

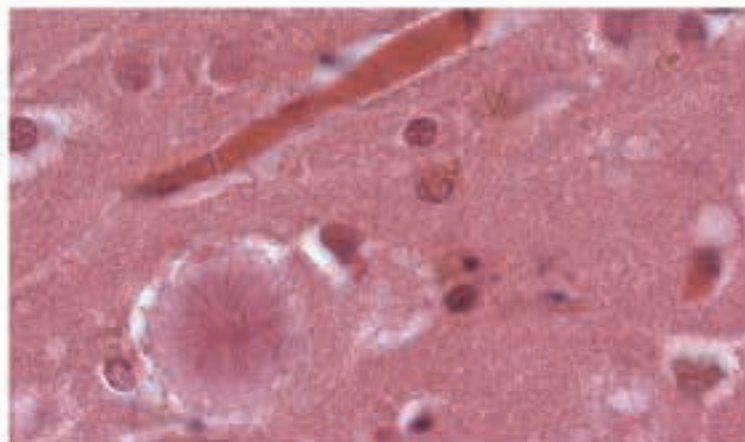

MASS™ Medical Storage understands the need for specialized storage within the cath lab. Our unique FIFO Glide™ Catheter Management System enables you to organize up to 735 hanging catheters. The FIFO Glide™ is specially engineered to provide simple inventory rotation. Inquire about our solutions for boxed catheters.

For your other cath lab supplies, MASS™ offers fully interchangeable storage systems with bins, drawers, shelves, trays, and more. Each component is available in different sizes, offering a unique opportunity to redesign the inner components of your carts or cabinets as needed.

## INFECTION CONTROL

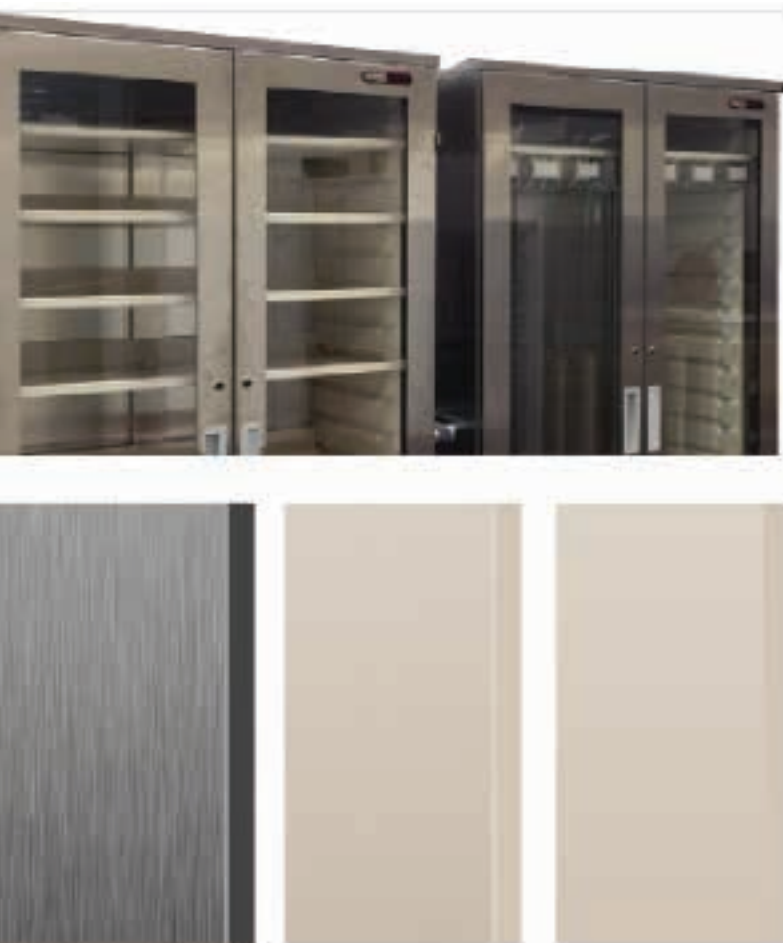

MASS™ Medical Storage's products are specifically designed with infection control in mind. With options such as medical grade stainless steel and antimicrobial paint, our product line focuses on infection control.

The MASS™ team closely monitors updates from governing societies such as TJC, AORN, SGNA, AAMI, and more. We know that you hold your cath lab to the highest standard; in order to help you maintain compliance, MASS™ focuses on staying current with changes in regulations.

## QUALITY CONSTRUCTION

Every MASS™ product undergoes multiple levels of quality control before leaving our production facility. From the moment the product is engineered to the final inspection, the MASS™ team prides itself on the quality of every one of our products. We manufacture carts and cabinets out of stainless steel, antimicrobial powder coated metal, and melamine.

- Premium German casters
- Medical grade laminate
- Heavy-duty, powder coated 14 and 20 gauge steel construction

## COLLABORATIVE PLANNING & CUSTOMIZED DESIGN

MASS™ is your design and engineer partner from common spec files to fully-customized storage systems.

- Valuable expertise in infection control and standards set by The Joint Commission for medical grade storage in many areas of medical facilities
- Design services at no additional cost

- Knowledgeable and accessible design and engineering professionals
- Efficient custom storage systems to maximize time, space, and productivity
- Enhanced construction documents with custom CAD and Inventor product drawings
- Standard and custom elevation options

## CATHETER MANAGEMENT

Let the experts at MASS™ help you design your cath lab to aid in compliance with The Joint Commission while also maximizing healthcare worker safety, infection control, and efficiency.

Our unique rotating FIFO Glide™ catheter tracks help you store more catheters than any other system—they can manage up to 735 catheters in one cabinet. Store long stent boxes, balloons, guide wires, and other supplies efficiently for easy access.

### SLIDE-OUT TRACKS

Our slide-out tracks increase visibility, making it easier to access full inventory.

### ROTATING HOOKS

With specially designed hooks that rotate a full 90°, catheter inventory management is quicker and more efficient.

### HANGING CATH

Utilize the FIFO Glide™ Catheter Management System to make the most of your cath lab storage space. Catheters hang vertically on our slide-out FIFO Glide™ tracks, inventory management smooth and efficient.

### BOXED CATH

The MASS™ Slide-Out Vertical Divider Module is specially designed to maximize space and offers clear visibility to inventory. Add shelves to increase your storage options without taking up more floor space.

### **LUCENT™**

- Translucent trays for better sight to equipment and supplies inside.
- Customizable dividers for adjusting size of individual supply compartments.
- Trays are available in varying heights.
- Easy to use and see labeling system supports Kanban and Lean/JIT barcode and RFID-based inventory systems.
- Meets standards of The Joint Commission; follows recommendations for infection control and manufacturer requirements.

### **EXCHANGE CARTS**

Mix and match interior components – trays, baskets, bins, shelves, and more. Easy to reconfigure for new packaging and procedures. Highly maneuverable with lightweight construction and premium casters. Available in Standard and Lucent.

### **MODULAR STORAGE CART**

Simplify the complexity of storing your electrophysiology equipment by customizing the MASS™ Modular Storage Cart with shelves, drawers, and more.

### **EXCHANGE WALL CABINET**

Take storage space to the next level with the Exchange Wall Cabinet system. Fully customizable to fit your needs, the Exchange Cart offers bins, trays, drawers, shelves, baskets, and more, offering you maximum storage space in one cabinet.

### LED LIGHTING

Improve inventory management by adding LED lighting to your cabinet or cart.

### FIFO GLIDE™

Our unique rotating FIFO Glide™ catheter tracks help you store more catheters than any other system—they can manage up to 735 catheters in one cabinet.

### DIGITAL PROXIMITY LOCKS

Eliminate the need to carry keys or remember pass codes.

### MASS truHEPA™

The MASS truHEPA™ pulls outside air through the HEPA filter and into the cabinet.

### HINGED GLASS DOOR

Offering visibility, increased durability, and security, the hinged glass door is a solid solution to your storage needs.

### TAMBOUR DOOR

Our roll-up tambour door provides an excellent option for small spaces. The door easily rolls up into a separate compartment that isolates dust and debris that may cling to the back of the door.

## CLIENT GALLERY

### MADE IN THE USA

MASS™ Medical Storage is a manufacturer of high-quality medical storage products that can be found in leading medical facilities all over the world.

We have over 20 years of experience in designing and building closed storage medical solutions made of stainless steel, powder coated steel, and melamine.
